FEATURES

- · Quick and easy input.
- Scans Employee ID's, Order ID's, Operation Numbers, and Work Center ID's from bar codes to minimize data entry effort and errors.
- Eliminates the need for data entry steps, saving time and reducing the possibility of errors.
- Automatically creates labor and attendance transactions.
- Real-time processing information from inprocess transactions.
- Automatically accounts for breaks and lunches to eliminate additional clocking in and out.
- Prints bar codes on travelers for each operation.

- Provides optional serial number operation tracking.
- Scans using a standard laser scanner.
- Allows in process transactions to be displayed on screen or on printed report.
- Allows for one employee to work on multiple operations, and automatically calculates the cost allocation per work order.
